SUMMARY

Data Engineer with 4+ years of experience building scalable ETL/ELT pipelines, cloud-based data platforms, and analytics workflows using Python, SQL, AWS, and modern data engineering tools. Experienced in transforming structured and semi-structured data into trusted datasets for analytics, reporting, and AI-driven applications. Strong background collaborating cross-functionally to develop reliable, production-grade data solutions with a focus on scalability, automation, and data quality.

TECHNICAL SKILLS

Python (Pandas, PySpark, NumPy), SQL, Spark, Hadoop, API Integrations, ETL/ELT Development, Data Modeling, Feature Engineering, AWS (S3, EC2, RDS, IAM), Databricks, Snowflake (Foundational Knowledge), Docker, PostgreSQL, MySQL, MongoDB, Git, GitHub, CI/CD Concepts, Informatica (PowerCenter, IICS), Tableau, Excel, Streamlit, Matplotlib, Scikit-learn, Regression, Classification, NLP Basics, Prompt Engineering, RAG, LLM Integrations, Data Warehousing, Star Schema, Relational Modeling, Data Quality, Data Transformation, Analytics Engineering

PROFESSIONAL EXPERIENCE

Lakeshore Global Corporation

Detroit, MI, USA

Data Analyst- Internship

July 2026 – Present

- Perform manpower and workforce analysis using Python, SQL, and Excel to evaluate staffing, retention, terminations, tenure, labor utilization, and workforce trends.
- Build weekly reports and dashboards tracking headcount, new hires, attrition, termination reasons, and 1-week through 90-day retention to identify staffing gaps and early turnover patterns.

Adaptive Waves

Boston, MA, USA

Data Engineer

Mar 2025 – Jun 2026

- Designed and maintained scalable ETL pipelines using Python and SQL, integrating structured and semi-structured data across relational and NoSQL databases for analytics and AI applications.
- Built reusable data transformation, feature engineering, and automation workflows while improving data quality, reliability, and delivery of dashboards and LLM-powered analytics solutions.

Jio Platforms Limited (JPL)

Mumbai, MH, India

Data Science Intern

Jun 2024 – Aug 2024

- Developed an AI-powered analytics platform using LLMs and RAG, enabling natural-language querying of enterprise databases and improving query interpretation accuracy by ~40%.
- Built Python- and SQL-based data preprocessing, transformation, and feature engineering pipelines to automate analytics and reporting workflows.

Accenture Solutions India Pvt. Ltd.

Mumbai, MH, India

Data Engineering Analyst

Jan 2021 - Jun 2023

- Designed and maintained 50+ production ETL pipelines supporting analytics for 1M+ healthcare users and migrated 600+ enterprise data mappings using AWS, Informatica IICS, and SQL.
- Improved data processing efficiency by ~40% while ensuring data quality and 100% SLA compliance; earned the ACE Award for delivery excellence.

PROJECTS

[HR Analytics Dashboard](#)

- Built an interactive Tableau dashboard analyzing 1,470 employees across 39 attributes, tracking attrition rate, active headcount, demographics, job satisfaction, and department-level workforce trends.
- Created calculated KPIs, filters, and dynamic age-group parameters to identify turnover patterns across gender, age, education, and departments, enabling data-driven workforce and retention decisions.

[Credit Risk Assessment](#)

- Built a data-driven credit risk model using historical borrower data to help financial institutions identify high-risk applicants and reduce loan defaults, improving decision quality in the approval process.
- Achieved ~80.9% prediction accuracy and improved decision transparency by validating key risk variables and fine-tuning a language model to generate clear, human-readable credit risk summaries using AI-assisted reporting.

[Portfolio Analysis](#)

- Designed and evaluated a diversified multi-asset investment portfolio across stocks, commodities, currencies, and bonds using quantitative analysis to balance risk and return under real-world constraints.
- Applied technical indicators and risk-management techniques (Moving Averages, Bollinger Bands, correlation analysis) to optimize performance, achieving a Sharpe ratio above 1.0 through volatility minimization and improved portfolio stability.

EDUCATION

University of Maryland

College Park, MD, USA

Master of Science in Information Systems

Dec 2024

University of Mumbai

Mumbai, MH, India

Bachelor of Engineering in Information Technology

May 2020
